

TELESIS IS

THE PIONEERS

While Telesis PINSTAMP® systems remain **the gold standard** in dot peen marking, our team consistently brings new game-changing products to market. Our Fiber laser markers introduced new technology to permanent marking and together with our Infrared, Green, UV, and CO2 markers continually push the boundaries of industrial marking. Forward-thinking Telesis-developed vision systems **create catalysts for industrial automation.**

RUGGED & RELIABLE

Telesis equipment is **built to last**. We engineer our laser marking systems and dot peen markers with **high-quality, robust materials** that stand up to the challenges of tough environments. Highest-quality laser sources, powder-coated metals, damage-proof screens, and sturdy materials are just some of the reasons our customers experience **fewer problems, less down time, and greater production efficiency.**
